# Wedding Photography Price Guide

Planning your wedding day is an exciting and precious time – putting together your magical day takes careful consideration as everything that goes into your wedding day is an expression of who you are as a couple. From the invitations, to the cake and guest favours, colour scheme and venue – each and every little personal touch is so important in making the day come together perfectly to reflect your individuality as a couple, and the photography is the most important way to capture that forever.

We are passionate about taking pictures that really capture the essence of you and your special day. We pride ourselves in taking natural and stunning images that tell the story of your wedding day so that you can look back and treasure them for years to come.

# Wedding Photography Price Guide

All of our wedding packages are individually tailored to suit your personal requirements as a couple. We will sit down with you to determine exactly what you need and create the perfect package to fit with your budget.

Our pricing is simple. We start with the daily photography rate and then you can add any extras from our 'pic and mix' selection to suit you – easy!

We understand that each wedding is different and so we do not put time limits on your day, we simply say that the daily photography rate includes full coverage of your day from getting to the ceremony to 7.30pm when the party really gets going!

## Daily Photography Rate

Weekday weddings: £850

Weekend weddings: £975

The packages include both of our professional photographers – Georgina and Hannah and a fantastic storybook album with a selection of finishes, which includes 40 pages (worth £300!) professionally designed by us. Or you can upgrade to a sumptuous leather album with mounted pictures for only £150, or our premium storybook album for £250.

Mileage is included up to 30 miles of NN12. Additional miles are charged at 50p per mile.

# Wedding Photography Price Guide
